

*Spirit was privileged to be asked to supply parts for the full sized prototype of the re-released "Big T" by Monogram*

# Really

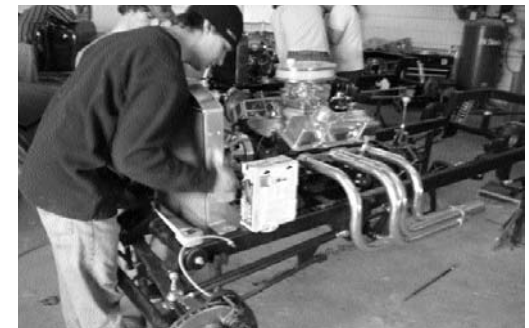

***Hands down the most complete kit on the market.***

If you have ever built a model you can build a Spirit Kit. Just make sure you use the garage floor instead of the kitchen table to build it on.

Spirit Industries has taken all the fit and figuring out of the equation by engineering a T bucket that requires no welding, takes only minimal body work, and has finished upholstery that just drops into place.

This kit comes with so many pieces and so many options we ask that you call us and let us custom tailor the kit to you. Making sure you get exactly what you want before you make your order.
